Independently drive a 650 HP NASCAR

Yiippi NASCAR Travel 2014

Daytona Hall of Fame

Yiippi NASCAR Travel 2014

- With over 650 HP on the asphalt in the oval glow!
- NASCAR stands for "National Association for Stock Car Auto Racing."
- Since 2008, NASCAR has been the top most popular motor sports league in the United States, this is called the Sprint Cup.
- NASCAR racing has roots that go all the way back to the prohibition era. Stock car drivers in the South would soup up their cars to evade police and quickly transport boot-legged alcohol. Almost a century later NASCAR has evolved into one of the most popular sports in American culture. With an estimated 75 million NASCAR fans worldwide, over 3 billion dollars is spent on merchandise every year.
- In the days of alcohol prohibition, smugglers souped up their cars, resulting in an illegal developed first race in the South. In 1947, the mechanic Bill France, founded the NASCAR organisation.
- The NASCAR engine technology was standardised in the 1960s. It continues to be strictly regulated. V8 engines with 5.7 litre displacement, carburettor and push rod operated valves for use. Today's engines; the Chevrolet Impala SS, Ford Fusion, Dodge Charger R / T, and Toyota Camry develop well over 850 hp, but will cut back on high-speed ovals by air restrictors for security reasons. The dull rumbling and powerful thundering sound of these typical American Motors certainly contributes to the success of NASCAR.

Yiippi NASCAR Travel 2014

- The season begins in mid-February with the famous Daytona 500; at Daytona International Speedway in Florida. Other highlights are the Coca-Cola 600 at Lowe's Motor Speedway in Charlotte (North Carolina), the Brickyard 400 at the world famous Indianapolis Motor Speedway and the EA Sports 500 at Talladega Superspeedway
